

Evening Sky Map

March

Map Shows Night Sky as it Appears

Early Mar 9:30 PM
Late Mar 8:30 PM

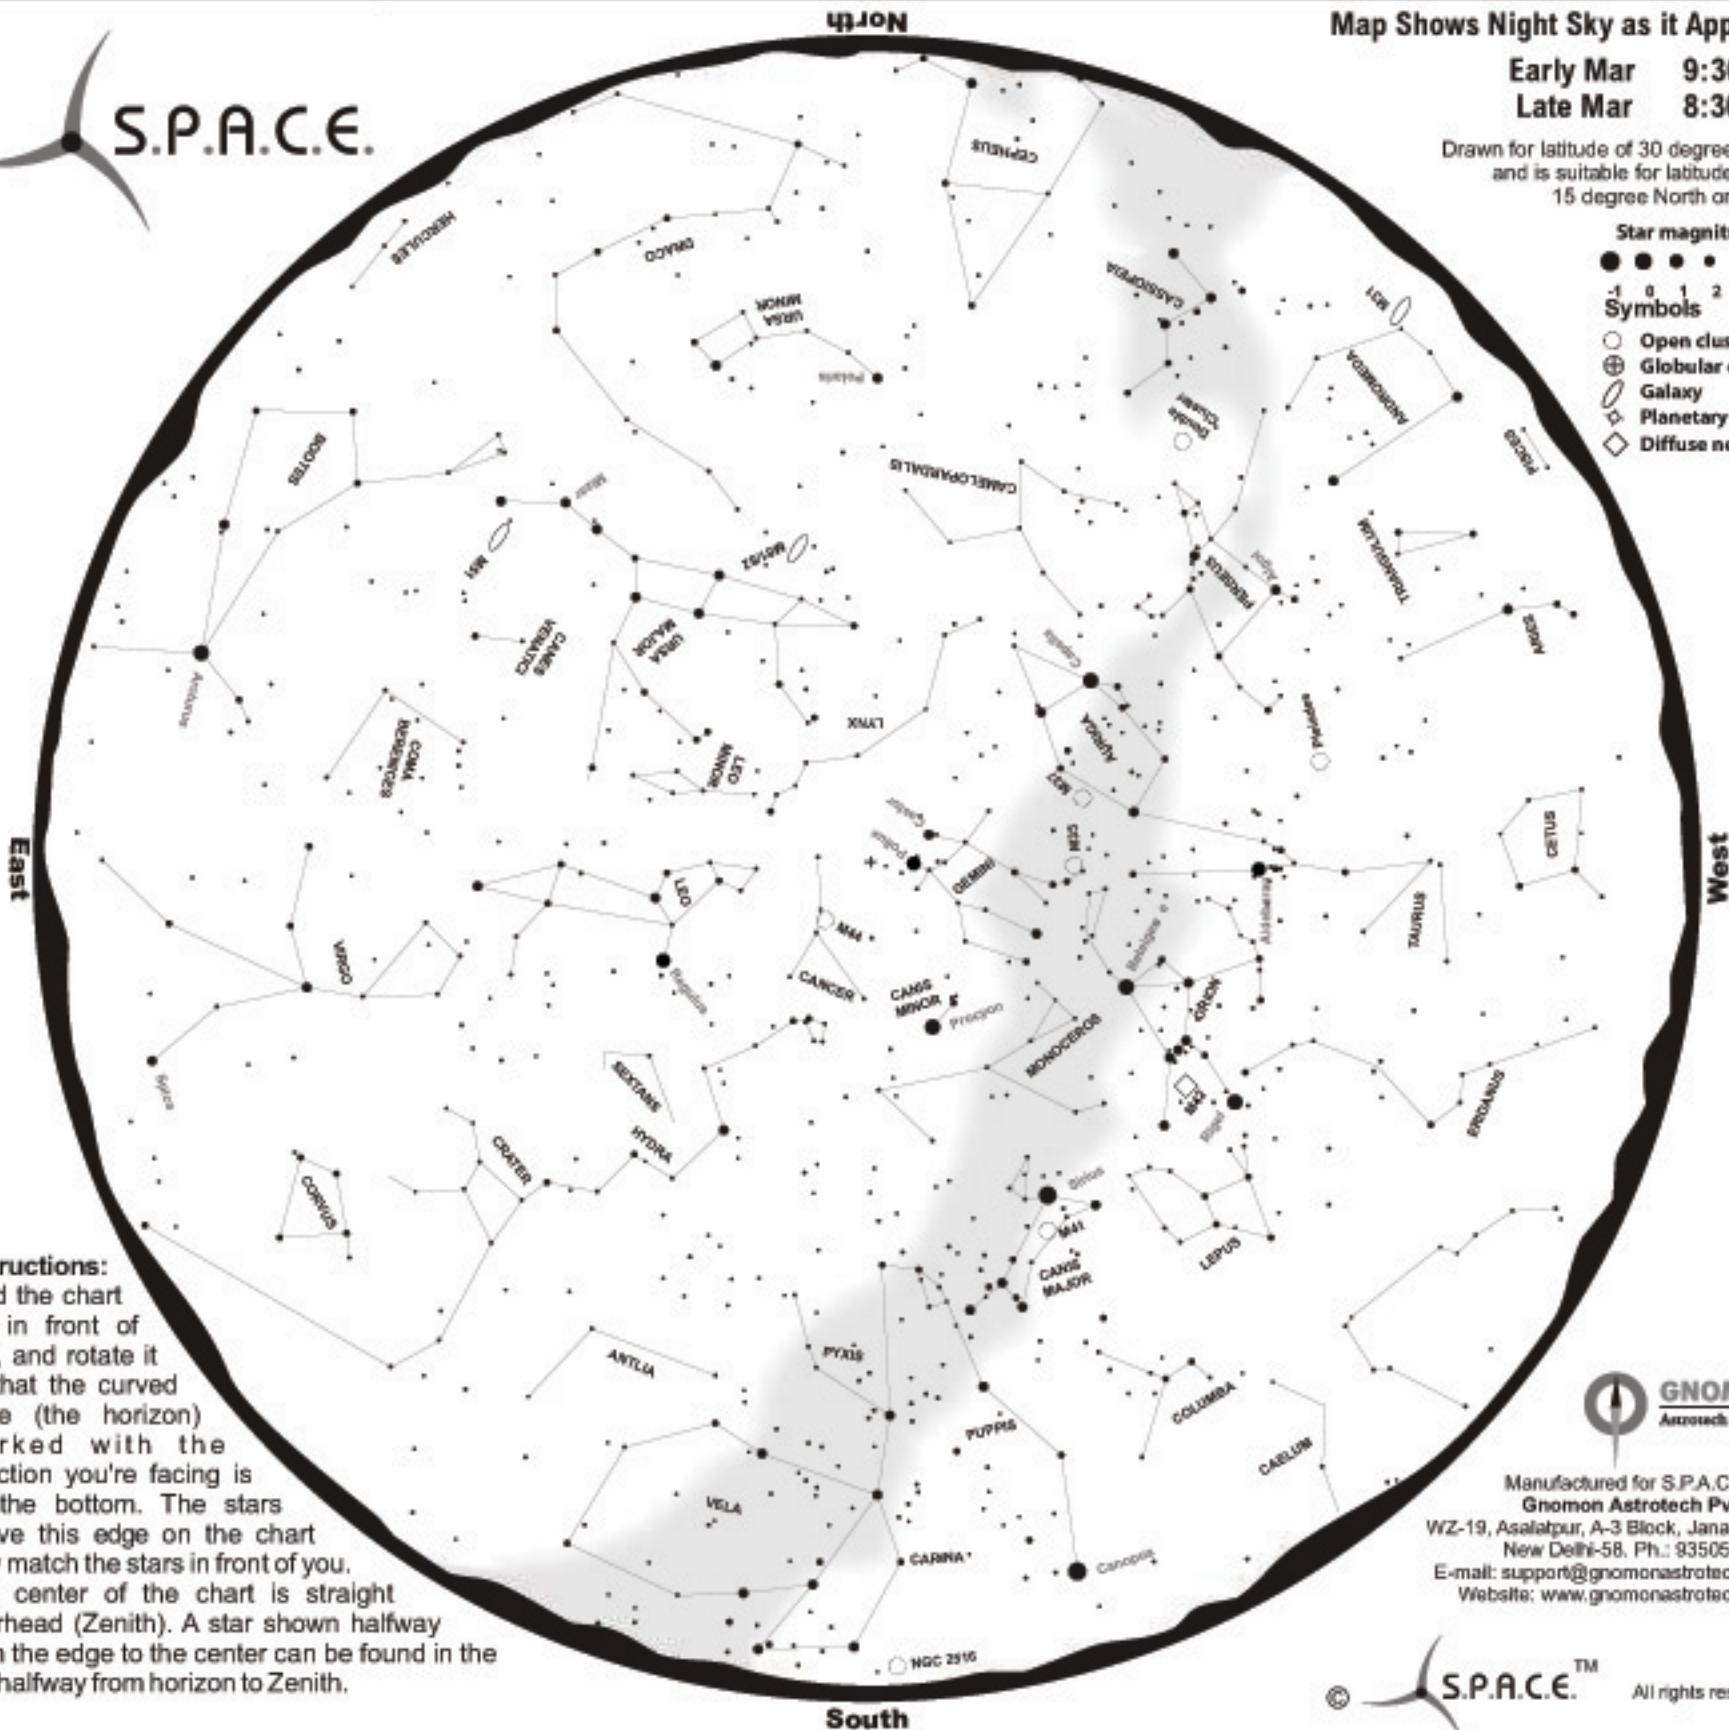

Drawn for latitude of 30 degree North and is suitable for latitudes upto 15 degree North or South

Star magnitudes

Symbols

- Open cluster
- ⊕ Globular cluster
- ☉ Galaxy
- ◇ Planetary nebula
- ◇ Diffuse nebula

Instructions:

Hold the chart out in front of you, and rotate it so that the curved edge (the horizon) marked with the direction you're facing is on the bottom. The stars above this edge on the chart now match the stars in front of you. The center of the chart is straight overhead (Zenith). A star shown halfway from the edge to the center can be found in the sky halfway from horizon to Zenith.
